

QUALITY AND ENVIRONMENTAL POLICY (ISO 9001 & ISO 14001)

ADERCO International SA (hereinafter referred as “**ADERCO**”) are committed to delivering products and services that consistently meet **customers and regulatory requirements** while protecting the environment in line with the international standards ISO 9001 and ISO 14001.

ADERCO is a **pioneer and a leader** by offering a fuel treatment technology improving the fuel efficiency and client’s sustainability.

ADERCO’s **vision** is a world where the industries we work with (shipping, mining, transport) are fully invested in decarbonization for a cleaner and more sustainable future.

ADERCO’s **mission** is achieving this vision by pioneering unusual technical solutions to a closed and conservative industry, combined with our capacity to reach out with personalised on the ball service and unrivalled technical advice and application expertise.

ADERCO’s **purpose** is believing the next generation deserves to live in a sustainable world that has embraces an efficient energy transition.

ADERCO is offering continuous information and educational opportunities to its employees to improve its expertise on fuel-related issues and is continuously searching opportunities to improve its solutions and its understanding and adherence to these principles.

Fueling innovation for the next generation is ADERCO’s main objective.

This policy is communicated to employees, clients, contractors and suppliers and is available to the public through selected media.
