

Sustainability Policy

Sustainability is embedded in Aderco's vision, mission and values and plays a key role in our strategy.

Aderco is therefore committed to protecting the environment, ensuring the safe supply of its products and the health and safety of its employees as well as others who may be affected by the company's activities.

As part of this, the management is committed to allocating the necessary resources to implement the CSR strategy:

- We help our customers to fight global climate change by providing them with 100% plant-based fuel processing solutions, thereby helping to minimise their carbon footprint;
- We aim to reduce our CO₂ emissions along our supply chain where it is possible or reduce employee travel;
- We attempt to protect biodiversity and ecosystem services and maintain good environmental quality associated with our own operations;
- We monitor Aderco's energy consumption, water use and waste generation;
- We adopt a socially responsible investment approach;
- We encourage responsible behaviour among all our employees;
- We are committed to meeting applicable regulatory requirements, corporate principles and any voluntary programmes we choose to subscribe to, as appropriate.
